

Fox Park Site Plan

Community Meeting #2 Comments

December 13, 2006
Fox Center, 7pm

Items Discussed:

Consensus was reached on the following:

- maintain the one spray feature (whale), with no spray area expansion
- expand the creative play areas (keeping them in the NW corner because they can't be moved closer to the ball fields due to safety)
- separating the 5-12 play apparatus from the 2-5 play apparatus
- include a sand feature
- keep the building
- if possible, connect the north and south ends through a pathway adjacent to the alley (an accommodating neighbor just has to make sure she can give up the space and still navigate into her garage)
- can remove the council ring passive area

Mixed opinions, but the majority agreed upon the following:

- fill in the pit (some people said no, they felt there was not a large security problem and did not want to spend the money to fill it in)
- eliminate basketball here (general feeling was there isn't enough space to put a half or full basketball court here, but one person would like to keep the basketball "shoot-around" feature for smaller kids)
